My heart is with thee ever, I think on thee alone; Nor time nor space can sever My spirit from thine own! In all my wanderings lonely O'er life's uncertain main,

Thy shadow, and thine only Still lengthens o'er my brain: From all that grief inherits I struggle to be free, And aye, my drooping spirits
Are cheered by thoughts of thes.

Thus, when the flowers are springing; And earth is robed in green When merry birds are singing Through all the joyous scene:-O, then I see the reason

Why thou art wont to sing, For like the vernal season Thy heart is ever spring!

MANUFACTURE OF GOLD. We have read that Boyle once very nearly succeeded in making gold; that he showed the experiment to Sir Isaac Newton, when both became frightened, and threw away the ingredients. A gentleman communicates to the editor of the Mining Journal, that having experimented some 10 years ago on the stratification of the earth and the formation of mineral deposits, he believes with tru hful results; he turned up one of his old experiments accidentally a few days ago, when he found running in a spiral string through one part a small quantity of gold. No gold was used in the experiment, and the conclusion arrived at is, that it has been formed from some of the other substances. This; however, is ucthing to what is asserted by an ironfounder of this town. This gentleman must have discovered the true philosopher's stone, which so many sages of the olden time spent their lives in trying to obtain. He declares that he has found out a process by which he can change any quantity of iron into gold. Before three months are over he says we shall hear more of this marvel. He promises to produce gold in tons; in short, in any quantity.—Livepool Albion.

SAN FRANCISCO. Thursday, October 11, 1849.

Arrival of the Steamer

By the arrival (yesterday the 10th,) of the Steamer California, Capt. Budd, which left Panama on the 17th of Sept, we have received through the polite attention of Capt. B. full files of papers from the States up to Sept. 1. We were fully prepared for the immediate issue of an Extra sheet, having our full force armed and equipped as the emergency of the case might require, for a simultaneous rush into the type metal and the publication of ability. "Important News" in considérable less than no time-but upon further examination we found it impossible to compress into a hasty summary, such as could alone be published in an Extra, the great variety of interesting intelligence before us. We can claim commissioners has been hereto-prefered, therefore, to await a few hours ore noticed,) will leave this city, in a few for our regular issue.

No mail has been received from New York by this arrival—the why and wherefore may be learned by an article which we publish in another column.

The papers, of which we are in possession, consist of a great number from New York of as late date as Sept. 1, and New Orleans of Aug 24, beside a large package of English papers received through the politeness of Mr. G. W. Leland, of Sullivan & Co's Express. From them we condense and select the following abridgement of news .-We shall follow it up by farther selections

and comments. Gen. Taylor has issued a Proclamation, wherein he sets forth that there is reason to believe that an armed expedition is shout to be fitted out in the United States with an intention to invade the Island of Cuba or some of the provinces of Mexico: he therefore warns all citizens of the United States against so gross a violation of our treaty obligations, reminding them of the heavy penalties denounced by our acts of Congress, and that no protection will be

afforded by their country. The official paper at Washington, the Republic, says that information has been for some time in possession of the Government at Washington, to the effect that bodies of men were in the course of being levied and drilled in New Orleans, New York, and including detention at Halifax. other cities of the Union; that money to a considerable amount has been contributed; arms provided, and arrangements made on a large scale with a view to this or some military expedition. Great secresy has been obtained to satisfy the President that the design of the expedition is an invasion of Cuba.

The Cholera in New York, St. Louis and elsewhere is, we think, on the decrease .-The Courier & Enquirer of Aug. 13, has the following:

THE CHOLERA .- By the City Inspector's report in an another column, it will be last week was 423,—being 255 less than during the previous week, and 291 less

than during the week ending July 21st.

The Cholera in Boston.—The number of deaths during the week ending August 11th, in Boston, as officially reported, were 240; of which 94 were cases of cholera, and 81 of various other diseases of the bowels. Nearly two-thirds of the above cases include foreigners.

nineteen, and of other diseases seventy. At St. Louis, the number of deaths from cholera for the week ending August 2, were thirty-four.

The cholera, according to the latest advices, was still raging at Quincy, Ill.

At Chicago, the same date, the number

of deaths from Cholera the previous 24 hours was 21. At the Federal City, no case of cholera

has been reported during the last thirty davs. The election returns are so indefinite that we postpone an attempt to give any

news of this character until such time as we can have leisure to digest it. Mails for California and Oregon. We find the following official notice in the

last Republic:
The United States steam-packet "Ohio" will be dispatched from the port of New

York on the 27th day of August instant.

The public is hereby notified that mails may be sent to New York, Charleston, South Carolina, and Savannah, Georgia, to be conveyed by the "Ohio," which will sail from New York on the 27th inst.; from Charleston on the 30th, morning (probably); from Savannah on the 30th, evening

(probably).

Mail bags should be made up at New York, and at the other points named, for Chagres, Panama, san Diege, santa Barbara, Monterey, san Francisco and Astoria

From the Courier and Enquirer, Aug 16 DETENTION OF THE GOVERNMENT MAIL STEAMER OHIO. In consequence of unexpected delay in the completion of the engines of the "Ohio," it has been found impossible to have her in readiness on the 27th inst., the day announced by the government advertisement for her departure for Chagres. Apart from the unexampled amount of labor which it has been found necessary to expend upon the machinery of this great vessel, the accidents which have occurred in the casting and setting of her work, will sufficiently account for the postponement. In the meantime, her will be supplied by the Falcon, which since the 1st of December last, has formed Dublin the corn fields have suffered a part of the same line, having been occupied by the Government for the service, until the steamers under contract shall be ready for duty. The Ohio will be completed as speedily as practicable, and her consort, the Georgia, will be in readiness for service during the coming month of

The Mexican Government, through its Minister in Washington, has complained to our government of outrages frequently perpetrated by armed bands of Americans traversing the Mexican territory, on their way to California—especially at the town of Passo del Norte. The minister states that they go through the country unprovided with passports and commit frequent ded with passports and commit frequent depredations upon the inhabitants. He further states that they will hereafter be for seditious libels published in the provinces, ah clderly member, M. Gastier, in are too great, to be entrusted in the hands

The Secretary of War has replied that Americans, like all other persons; by entering Mexican Territory, make themselves subject to Mexican laws, and must expect to pay weatever penalties may be attached to their violation.—N. Y. Cour. & Eng.

She brings intelligence of the actual departure of the Danish blockading squadron and the withdrawal of the cruising vessels off Heligoland preventing free ingress and egress to the respective ports. Numbers of merchant vessels had enterbeen observed, but sufficient evidence has ed the Weser, and commerce was resuming activity

interest. The entrance of the Hungari. ans from Comorn into Raab is fully confirmed, and they only differ as to the booty which was secured in or near Raab by the Magyars. The greatest alarm was excited in Vienna and Presburg by the news of the advance of the Hungariseen that the number of deaths by cholera ans, whose outposts are said to have appeared. In Weisselberg all the troops that could be spared from Vienna, were immediately dispatched by railway to Presburg, and it is said that many of the soldiers, who were raw recruits, left with very great discouragement and reluctance

It made by words, the soldiers withdrew quitted his position, and the Russians, a good deal cut up, followed him; but where the Hungarian General is, does not appear very clear, whilst his enemies have, after a march of great danger and difficulty, crossed the Theiss, and taken up a position near the banks of Nured.

[This is all the intelligence thus far received from Hungary, except that contained in the rumor from Paris, that a letter from Vienna announced that the Austrian Government had resolved to negotiate with the Hungarians; and the rather inconsistent statement in anothert part of the dispatch, that Austria had called on Bayaria for further military aid and had been promised a contingent of 50,000

As to the battle mentioned above, so far as this account goes, it would seem to indicate that Georgey had suffered a virtual defeat, though not so decisive as to prevent the successful withdrawal of his force. Little, however, can be inferred from the very meagre mention made of the matter of our despatch. The mail accounts will be awaited with interest.] GREAT BRITAIN.

In England, local politics were never in abeyance more than at this moment. the interest of the royal visit to Ireland having passed away, the London journals find the greatest difficulty in filling their

AFFAIRS OF FRANCE. At length after a setting of eighteen months, only interrupted by the brief in-tervals occupied in the election, the Legislative Assembly of France has adjourned to the 1st of October next.

At the last setting but one, during an

The French Government, it is said, have received information that Austria had apsifor F. Smith, Governor of California. It is understood that these despatches will convey very important instructions to Gen; Smith concerning the future government.

The modification of the Ministry was thought likely, by the retirement of Messrs Defaure and Odillon Barrot.

The troops left at Rome; by Gen. Oudinot, have exhibited strong feelings of dis-satisfaction at not being permitted to re-turn to France; the object of the expedition having been accomplished, they deem it not only an act of injustice but of cruelty, to detain them any longer from their families and friends.

The Court of Assizes, at Marseilles, had just commenced the trials of the rioters amounting to 150. Out of this number 57 were found guilty and sentenced to vari ous kinds of punishment, from transporta tion to imprisonment. The remainder were acquitted.

CO.—The undersigned beg leave to inform the public that a survey of the city of south San Francisco has just been completed, and a map of the city is now to be seen at the store of De Boom, Vigneaux &

Grisar, on Clay street.

The site is located on the Bay of san Francisco, two miles southerly of the city of san Francisco, and in plain sight of the shipping in the harbor.

The same depth of water which is found in the harbor of the city of san Francis-co, is to be found in the harbor of the city of south san Francisco and along the bay between the two harbors.

The harbor is more securely protected from the wind than the harbor of the city of san Francisco, and ships of the heaviest burden may lay within a boats length of the land at many points, and quite close generally along the whole front of the city, affording the best facilities for discharging

cargo.

The land rises in a gentle slope from the water, and is composed of a rich clay soil.

There are extensive stone quarries, and springs of fine running water are found on the face of the hill in many places.

The character of the soil always keeps the air free from dust or sand; the sur-rounding scenery is highly picturesque, and a more pleasant place for residences, or a more convenient place for business is not to be found on the bay.

A stream of the finest water in California, and sufficient in quantity to water both cities, and all the shipping that ever may lay in their harbors, forms the northern boundary of the city, and will be con-

ducted into a reservoir for such purposes.

The only practicable route for a good oad from the city of san Francisco to san Jose, will pass through south san Francis co, crossing the mouth of Mission creek and the mouth of the creek just alluded to. From san Francisco to san Jose and fonterey is one of the best natural roads in the world, and passing on this road from south san Francisco, you travel along a beautiful valley of hard grass land to the ouertesuelo, a distance of less than two

Persons desious of seeing the city wil go out on the old Mission road, and will ind the Mission about half way.

It is but a short ride-go out and see for yourselves, and if you wish to purchase ots that will shortly equal in value those of the city of san Francisco, call on the subscribers at the store of De Boom, Vigneaux & Grisar.

NEW YORK OF THE PACIFIC.—The City of New York, of the Pacific, site uated at the head of ship navigation upon the bay of Suisun at its junction with the rivers Sacramento and San Joaquin, has been most accurately surveyed by Captain R. P. Hammond, U. S. A., and laid out in the most beautiful and convenient manner, and maps have been prepared by E. H.
Rowe, Esq., engineer and land surveyor,
pointing out clearly each and every lot
within the surveyed limits of the city, and the proprietors now offer them for sale to the public. Along the entire water front of the city, a public street is laid out one hundred and fifty feet in width, beyond which no ground will ever be sold and the proprietors therefore guarantee to the purchasers of all lefter guarantee. screws, gimblets, mallets, augers, weights, planes, squares, bevils, braces and bitts, tween their nurchase and all the fronting on Water street; that no building shall ever be erected between their nurchase and all the fronting on water street; is no point along the entire water front of the city at which vessels of the largest knives, hoes, spoons, coffee mills, brushes, locks, files, door handles, wrenches, mill class cannot lay within thirty feet of the saws, sad irons, bench screws, spring balances, spirit levels, tacks, nails, spikes, points where a large class of vessels canshovels, spades, latches, knives and forks, not come immediately to the bank and disbutcher knifes, pocket do, chisels, plyers, charge their cargoes, and at all points compasses, spoke shaves, shot, percussion caps, &c., &c.

Groceries and Provisions—Kiln dried corn meal, flour, hams, tongues, dried apples, pickles, raisins, butter, cheese, coffice current success and pless pickles are successful to the bank and distributed to the bank and at all points where this cannot be done, wharves will be built by the proprietors as soon as material and distributed to the bank and distributed the other streets seventy e feet; the lots are fifty feet front, by one hundred deep, and there is not a lot within the sur-

vey unfit for building purposes.

There are three public squares laid out within the survey, which will be given to the city, and the proceeds of the sales of all the lots fronting on the squares will be appropriated to the erection of public build-

ings. The titles to this property fect and complete in every particular. There will be established immediately at the city a record office in charge of a com-petent official person authorized to take acknowledgements and record deeds, and where the original title deed to this property will be recorded, and where it is desired that all deeds for lots purchased should be immediately recorded.

The purchasers will be required to make improvements within a specified time.

The advantages of the location of this city over any other above San Francisco, are too well known to all who have either passed up the river Sacramento or Sun Joaquin to require any comment from the proprietors; but to all persons who have not had the opportunity to examine the site, we say that there is not in all Califor-nia a point combining so many advantages for business purposes, with the advantages of a fine, healthy climate, dry soil, free from inundation, at every point, throughout the year, a superior harbor for vessels of the largest class, and an abundant sup-ply of pure water at all seasons. To these advantages, we will add that permanent arrangements have been made for two steamers to commence running in all the month of August daily from San Francisco to the new city; and also two steamers of very light draught of water with tow boats prepared to navigate the Sacramento and san Joaquin, and their tributaries, from New York, below which they will not come.

For lots or any information connected with the city of New York of the Pacific, apply

at the office of the proprietors in Ports-mouth square, san Francisco, and at the city of New York. J. D. STEVENSON, W. C. PARKER, G. McDOUGAL, Proprietors TOWN OF SUTTER.

(LATE SUTTERSVILLE.)
This town has has just been re-surveyed and laid out by Lt. J. W. Davidson, of the U. S. A., and lots therein are now offered for sale here, by the subscribers, and at the Town by George McDougald & Co. This town is beautifully situated upon the east bank of the Sacramento, within about two miles of Sutter's Fort, having a fine road leading therefrom direct to the mining region, and is some six miles nearer the mines by this road than any other embarcars point upon the river. A direct road is also being made on the opposite side of the river, which will, when completed, save 74 miles land travel to the mines The locations upon the river banks for business purposes are never subject to overflow by the highest water known on the river, and the high ground back is the most desirable location for a residence of any point that can be selected upon the banks of the Sacramento.

TOWN OF SANTA CRUZ. The survey of this Pueblo, one of the oldest in California, has recently been corrected and mapped by Lieut. Williamson, U. S. A. It is situated in the Bay of Monterey, and presents more advantages for an agreeable residence than any other in California, for it is well known that at no part of the whole country is the climate purer, water better, soil more fertile, and where so unlimited a supply of lumber and timber for building and fencing purposes can be procured at prices nearly as low as the United States. The town and planting grounds are laid out in lots of 50 years square, a large number of which are now offered for sale at very moderate prices by

the subscribers. SAN FRANCISCO. Some of the most desirable locations for private residences or business purposes in this town, can be purchased or leased of

the subscribers. Maps of the city of New York of the Pacific, the towns of Sutter, Santa Cruz, and san Francisco can be seen at the Land Office of the subscribers on Clay street, south

STEVENSON PARKER & CO. iii ua‡

YOWN OF BOSTON.-Lots at the town of Boston, beautifully situated at the junction of the American Fork and Sacramento rivers, are now offered for sale. The town of Boston is only a few hundred yards above Sutter's Embarcadero, on the north side of the American Fork, and in the immediate vicinity of the gold mines, and from its situation possesses superior advantages for business purposes. The land which forms the site of the town is twelve feet above the highest water mark, and the river is twenty-three feet in depth at the banks. It is believed that no place offers greater inducements for investments than this town, as in addition to the above mentioned advantages it has a fine climate, good soil, with an abundance of excellent good soil, with an abdulation at all water, and is free from inundation at all seasons. The town has been surveyed by Mr. J. Halls, and laid out in a convenient manner, and a plan of it can be seen, and any other information relating to it obtain-ed on application to HIRAM GRIMES,

FOR SALE OR LEASE.—The new store T on the corner of Kearney and Secra-mento streets. Please apply to HIRAM GRIMES,
